Press Release

Needles Txema Yeste

14 February – 23 May 2025

Needles, 2019-2024.

"At times, Yeste's needles look more like wire, evoking the work of the sculptor Alexander Calder, who had a very similar sense of play. At other times, the needles suggest the simple line drawings that Picasso and Matisse would make daily.

And yes, there's the same gentle, unnameable collaboration between sculpture and photography. Sculpture with an eye for how the camera sees things; photography with an eye for how an object might present itself.

Txema Yeste is both sculptor and photographer here, which puts him in a long and rich tradition of artists who have combined the two".
